

## **EXHIBIT 23**

**DOCUMENT SOUGHT TO BE  
SEALED**

## HIGHLY CONFIDENTIAL - ATTORNEYS EYES ONLY

<p style="text-align: right;">Page 70</p> <p>1 Q Yes.</p> <p>2 A No.</p> <p>3 Q Have you ever seen one?</p> <p>4 A Yes.</p> <p>5 Q When did you see one?</p> <p>6 A I saw one at the JavaOne Conference. I</p> <p>7 forget which year. It was in the middle of the</p> <p>8 first decade. I saw it -- it was demonstrated to</p> <p>9 me, and I used it a little bit.</p> <p>10 Q Have you seen one since then?</p> <p>11 A No.</p> <p>12 Q What, if any, opinions do you have</p> <p>13 regarding the Java API structure, design and</p> <p>14 functional aspects, including the relationships</p> <p>15 between implementing code and declaring code in the</p> <p>16 Java platform?</p> <p>17 A In general, my view is that the structure,</p> <p>18 sequence and organization of the Java API packages</p> <p>19 at issue is a very rich creative work. The</p> <p>20 implementing code is also a rich creative work.</p> <p>21 Q Do you have any other opinions regarding</p> <p>22 that topic?</p> <p>23 A I'm happy to answer specific questions,</p> <p>24 but those would be my high-level views relevant to</p> <p>25 this case.</p>	<p style="text-align: right;">Page 72</p> <p>1 to design APIs?</p> <p>2 A Because there are so many choices to be</p> <p>3 made.</p> <p>4 Q Have you ever re-implemented an API from</p> <p>5 another platform or language?</p> <p>6 A In the context of Java or in some other</p> <p>7 context?</p> <p>8 Q In any context.</p> <p>9 A Not to my recollection.</p> <p>10 Q Would you agree that Java borrows certain</p> <p>11 aspects of programming from the C++ language?</p> <p>12 A Do the Java APIs have elements in common</p> <p>13 with C++ APIs?</p> <p>14 Q Sure.</p> <p>15 A There are probably a few.</p> <p>16 Q For example, some of the names are the</p> <p>17 same, right?</p> <p>18 MR. RAMSEY: Objection. Form.</p> <p>19 THE WITNESS: It's been a long time since</p> <p>20 I looked at the C++ standard library. Some names</p> <p>21 might be the same, some might not.</p> <p>22 BY MR. KAMBER:</p> <p>23 Q Have you -- are you familiar with C++?</p> <p>24 A Broadly speaking. I've never used it very</p> <p>25 much.</p>
<p style="text-align: right;">Page 71</p> <p>1 Q As between the declaring code and the</p> <p>2 implementing code, would you characterize one as</p> <p>3 more rich and creative as compared to the other?</p> <p>4 A No.</p> <p>5 Q As between a -- strike that.</p> <p>6 As between declaring code and implementing</p> <p>7 code, which do you think is more important for</p> <p>8 developers?</p> <p>9 MR. RAMSEY: Objection. Form.</p> <p>10 THE WITNESS: Neither.</p> <p>11 BY MR. KAMBER:</p> <p>12 Q Would you characterize them as equally</p> <p>13 important?</p> <p>14 A Yes.</p> <p>15 Q Would you say that's true kind of across</p> <p>16 the board for all APIs and API packages as they're</p> <p>17 implemented?</p> <p>18 A In the context of the Java SE platform?</p> <p>19 Q Sure.</p> <p>20 A Yes.</p> <p>21 Q Have you yourself designed APIs?</p> <p>22 A Yes.</p> <p>23 Q Do you consider that a creative process?</p> <p>24 A Absolutely.</p> <p>25 Q Why do you consider it a creative process</p>	<p style="text-align: right;">Page 73</p> <p>1 Q Besides Java, what other languages are you</p> <p>2 familiar with?</p> <p>3 A I've used many languages over the years.</p> <p>4 I've obviously written a fair bit of Java code.</p> <p>5 I've written a fair bit of C code. Little bits of</p> <p>6 C++ here and there, but never that seriously. I've</p> <p>7 written a fair bit of Python. I've written lots of</p> <p>8 LISP and Scheme, mainly when I was in graduate</p> <p>9 school, and then various other academic-type</p> <p>10 languages.</p> <p>11 Q What, if any, opinions do you have</p> <p>12 regarding packages, classes, methods and interfaces</p> <p>13 and their roles within an API and the Java APIs</p> <p>14 specifically?</p> <p>15 A Package, classes, methods and interfaces</p> <p>16 are the fundamental structural concept, essentially,</p> <p>17 in the Java programming language. Any API will make</p> <p>18 use of all of those tools in its definition.</p> <p>19 Q What is an interface --</p> <p>20 A In which --</p> <p>21 Q -- in Java?</p> <p>22 A In which sense do you mean?</p> <p>23 Q Well, I guess, let me point you to</p> <p>24 Exhibit 1508 that -- again, starting at line 20, it</p> <p>25 says, "Dr. Reinhold may also offer testimony</p>
